Request for Prior Authorization Luxturna (voretigene neparvovec-rzyl)
Website Form – www.wv.highmarkhealthoptions.com
Submit request via: Fax - 1-833-547-2030.

All requests for Luxturna (voretigene neparvovec-rzyl) require a Prior Authorization and will be screened for medical necessity and appropriateness using the criteria listed below.

Luxturna (voretigene neparvovec-rzyl) Prior Authorization Criteria:

Coverage may be provided with a diagnosis of biallelic *RPE65* mutation-associated retinal dystrophy and the following criteria is met:

- Must have a diagnosis of retinal dystrophy with confirmed RPE65 mutation in both alleles confirmed by both of the following:
  - Clinical documentation confirming diagnosis of Leber congenital amaurosis (LCA) or Retinitis pigmetosa (RP) including clinical features, funduscopic appearance, and results of testing such as dark-adapted thresholds, Ganzfeld-flash electroretinography (ERG), and when appropriate, perimetry.
  - Documentation of positive genetic test result confirming a biallelic pathogenic or likely pathogenic RPE65 mutation (homozygote or compound heterozygote) by a CLIA-approved mutational test.
- Must be prescribed by or in consultation with an ophthalmologist
- Must have viable retinal cells as determined by at least one of the following:
  - Area of retina within the posterior pole of greater than 100 µm thickness per OCT
  - At least 3 disc areas of retina without atrophy or pigmentary degeneration within the posterior pole
  - Remaining visual field within 30 degrees of fixation as measured by a III4e isopter or equivalent
- Is age-appropriate according to FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature
- The requested dose and frequency is in accordance with FDA-approved labeling, nationally recognized compendia, and/or evidence-based practice guidelines
- Has not previously received treatment with voretigene neparvovec-rzyl in the requested treatment eye(s)
- **Initial Duration of Approval:** 1 injection per eye (1 month)
- **Reauthorization criteria**
  - None – one time use

Coverage may be provided for any non-FDA labeled indication if it is determined that the use is a medically accepted indication supported by nationally recognized pharmacy compendia or peer-reviewed medical literature for treatment of the diagnosis(es) for which it is prescribed. These requests will be reviewed on a case by case basis to determine medical necessity.

When criteria are not met, the request will be forwarded to a Medical Director for review. The physician reviewer must override criteria when, in their professional judgment, the requested medication is medically necessary.

MEDICAL HISTORY (Complete for ALL requests)

Diagnosis:	ICD Code:

Does the member have confirmed RPE65 mutation in both alleles? ☐ Yes ☐ No

Is there clinical documentation confirming diagnosis of Leber congenital amaurosis (LCA) or Retinitis pigmetosa (RP) including clinical features, funduscopic appearance, and results of testing such as dark-adapted thresholds, Ganzfeld-flash electroretinography (ERG), and when appropriate, perimetry? ☐ Yes ☐ No

Is there documentation of positive genetic test result confirming a biallelic pathogenic or likely pathogenic RPE65 mutation (homozygote or compound heterozygote) by a MoIDX-approved mutational test? ☐ Yes ☐ No

Which eye is being treated? ☐ Left ☐ Right ☐ Both

Has the member previously received treatment with voretigene neparvovec-rzyl in the requested treatment eye(s)?
☐ Yes ☐ No

Does the member have viable retinal cells? Select all that apply to the member:
- ☐ Area of retina within the posterior pole of greater than 100 µm thickness per optical coherence tomography (OCT)
- ☐ At least 3 disc areas of retina without atrophy or pigmentary degeneration within the posterior pole
- ☐ Remaining visual field within 30 degrees of fixation as measured by a III4e isopter or equivalent
